

ULTRA HIGH PERFORMANCE WINTER TYRE

ICE BLAZER ALPINE **EVO1**

PERFORMANCE RATINGS:

This European exclusive UHP winter tyre was developed specifically to provide stability and handling in winter weather conditions for European cars and SUVs. The asymmetric, wide-block pattern balances handling and driving comfort, and increases snow traction for more efficient braking. **Alpine Evo 1** utilizes a winter-weather compound which helps maintain tread softness for maximized grip, reduced rolling resistance, and improved driving comfort.

WINTER PERFORMANCE

The 100% silica compound maximizes grip, offers lower rolling for great fuel economy, reduces wear resistance for longer tyre life, and also maintains softness in a variety of winter weather conditions. The tread pattern utilizes a groove and sipe design that improves traction and braking performance on wet and snowy roads.

WINTER COMFORT

The widened pattern blocks located on the tyre shoulder improve control on dry and snowy roads. The tread profile is designed for optimal handling and driving comfort while the tread pitch sequence effectively reduces wheel vibration to promote even tread wear and a quiet, comfortable drive.
