

HIGH PERFORMANCE WINTER TYRE

# ICE BLAZER ALPINE+

## PERFORMANCE RATINGS:

The latest generation of HP Alpine winter tyres for cars and family sedans focused on improving safety in wet winter conditions. The **ALPINE+** has a directional pattern that effectively breaks through and disperses snow and water for improved traction and braking performance. ALPINE+ comes in sizes ranging from 13inch to 17inch.

### WINTER SAFETY

The spear-shape pattern effectively disperses snow and water quickly to maintain secure contact with the road. The tread pattern is made with a 100% silica compound that maximizes grip, reduces rolling resistance, and tread wear while also maintaining softness in extreme cold temperatures.

### SNOW TRACTION

A variable pitch design and increased number of lateral grooves and sipes provide greater performance on wet and snowy roads.

### WINTER COMFORT

The tread is designed with an optimized pitch sequence and profile which reduces wheel vibrations for fewer noise emissions and even tread wear, as well as improving steering response for overall greater driving comfort.
