

HIGH PERFORMANCE WINTER TYRE

# ICE BLAZER ARCTIC

## PERFORMANCE RATINGS:

This studless performance winter tyre is designed with an asymmetric tread pattern which offers greater grip, handling, and braking capabilities for a more focused performance enhancement on ice and snow. The ICE BLAZER **ARCTIC** comes in 28 different common sizes ranging from 14in to 18in.

### INNER TREAD ELEMENTS

The z-shaped inner tread elements help to increase the tyre footprint. The high density multi-angle siping improves grip allowing for easier braking on ice and snow.

### OUTER TREAD ELEMENTS

Various crisscrossing grooves and sipes effectively pack and discharge snow. This improves overall grip for efficient braking and handling on ice and snow.

### WINTER COMFORT

The groove pattern effectively reduces tyre vibration with its sound absorbing groove design while also efficiently breaking through and discharging ice and snow.

### SIPE DESIGN

The tread blocks are separated into a dense group of sipes which improve tyre traction on snow and ice. At the base of the sipes is a specialized design which interlocks the sipes to enhance block stiffness for improved tyre endurance and driving performance on wet and dry roads.
